

Use case: Produce Member Report **extends** Manage Reports

Context: The Produce Member Report use case produces a list of each service that a member received in a given week.

Actors: Manager, Timer

Main Success Scenario:

1. The system uses the member number to find the member's records.
2. The system produces a file containing the following information:
 - a. Member Name
 - b. Member Number
 - c. Member City
 - d. Member State
 - e. Member ZIP code
 - f. For every service
 - i. Date of service
 - ii. Provider name
 - iii. Service name
3. The system saves the file.
