Use case: Produce Provider Report **extends** Manage Reports

Context: The <u>Produce Provider Report</u> use case produces a list of services that a provider administered in a given week.

Actors: Manager, Timer

Main Success Scenario:
1. The system uses the provider number to find the provider's records.
2. The software product produces a file containing the following information:
    a. Provider Name
    b. Provider Number
    c. Provider City
    d. Provider State
    e. Provider ZIP code
    f. For every service
        i. Date of service
        ii. Date and time that service report was received
        iii. Member name
        iv. Member number
        v. Service code
        vi. Fee to be paid
    g. Total number of consultations (3 digits)
    h. Total fee for week (up to $99,999.99)
3. The system saves the file.
